

# No terminal rode:

```
npm install --save react-native-share
```

## No terminal rode:

```
react-native link react-native-share
```

# Dentro de app/pages/CameraAccess.js

```
import React, { Component } from 'react';
import {
  StyleSheet,
  Text,
  View,
  Button,
  CameraRoll,
  Image,
  UIManager,
  LayoutAnimation,
  TouchableWithoutFeedback // <- novo import
} from 'react-native';
import Share from 'react-native-share'; // <- novo import
```

## Dentro de app/pages/CameraAccess.js, altere o método renderPhotos:

```
renderPhotos() {  
  return this.state.photos.map((photo, index) => {  
    return <TouchableWithoutFeedback key={index} onPress={() => this.sharePhoto(photo.node.image.uri)}> // <-- nova linha  
      <Image // <-- tiramos o key dentro de image  
        style={{  
          width: 100,  
          height: 100  
        }}  
        source={{ uri: photo.node.image.uri }}  
        resizeMode="contain"  
      />  
    </TouchableWithoutFeedback>; //<-- nova linha  
  });  
}
```

Dentro de app/pages/CameraAccess.js, adicione o método :

```
sharePhoto(url) {  
  const options = {  
    title: "Compartilhando minha foto",  
    url  
  };  
  
  Share.open(options)  
    .catch((err) => { err && console.log(err); })  
}
```

# No terminal rode:

```
react-native run-android
```

Veja o resultado!
